To Analyze Designs and Identify Column Layout

Next, we will use the simplified wireframe design to help us see the site in terms of underlying layout and containing boxes.

1. Examine the wireframe diagrams presented in the PDF files here . The initial wireframes are for a desktop device and the ones at the bottom are for a mobile device. There are a number of things worth noting.
2. Notice that there are containers that run the width of the screen and there are invisible containers to the middle of the view that contain the content.

3. Look through the desktop wireframe and identify the various columns.

Responsive Grid System

Assessment

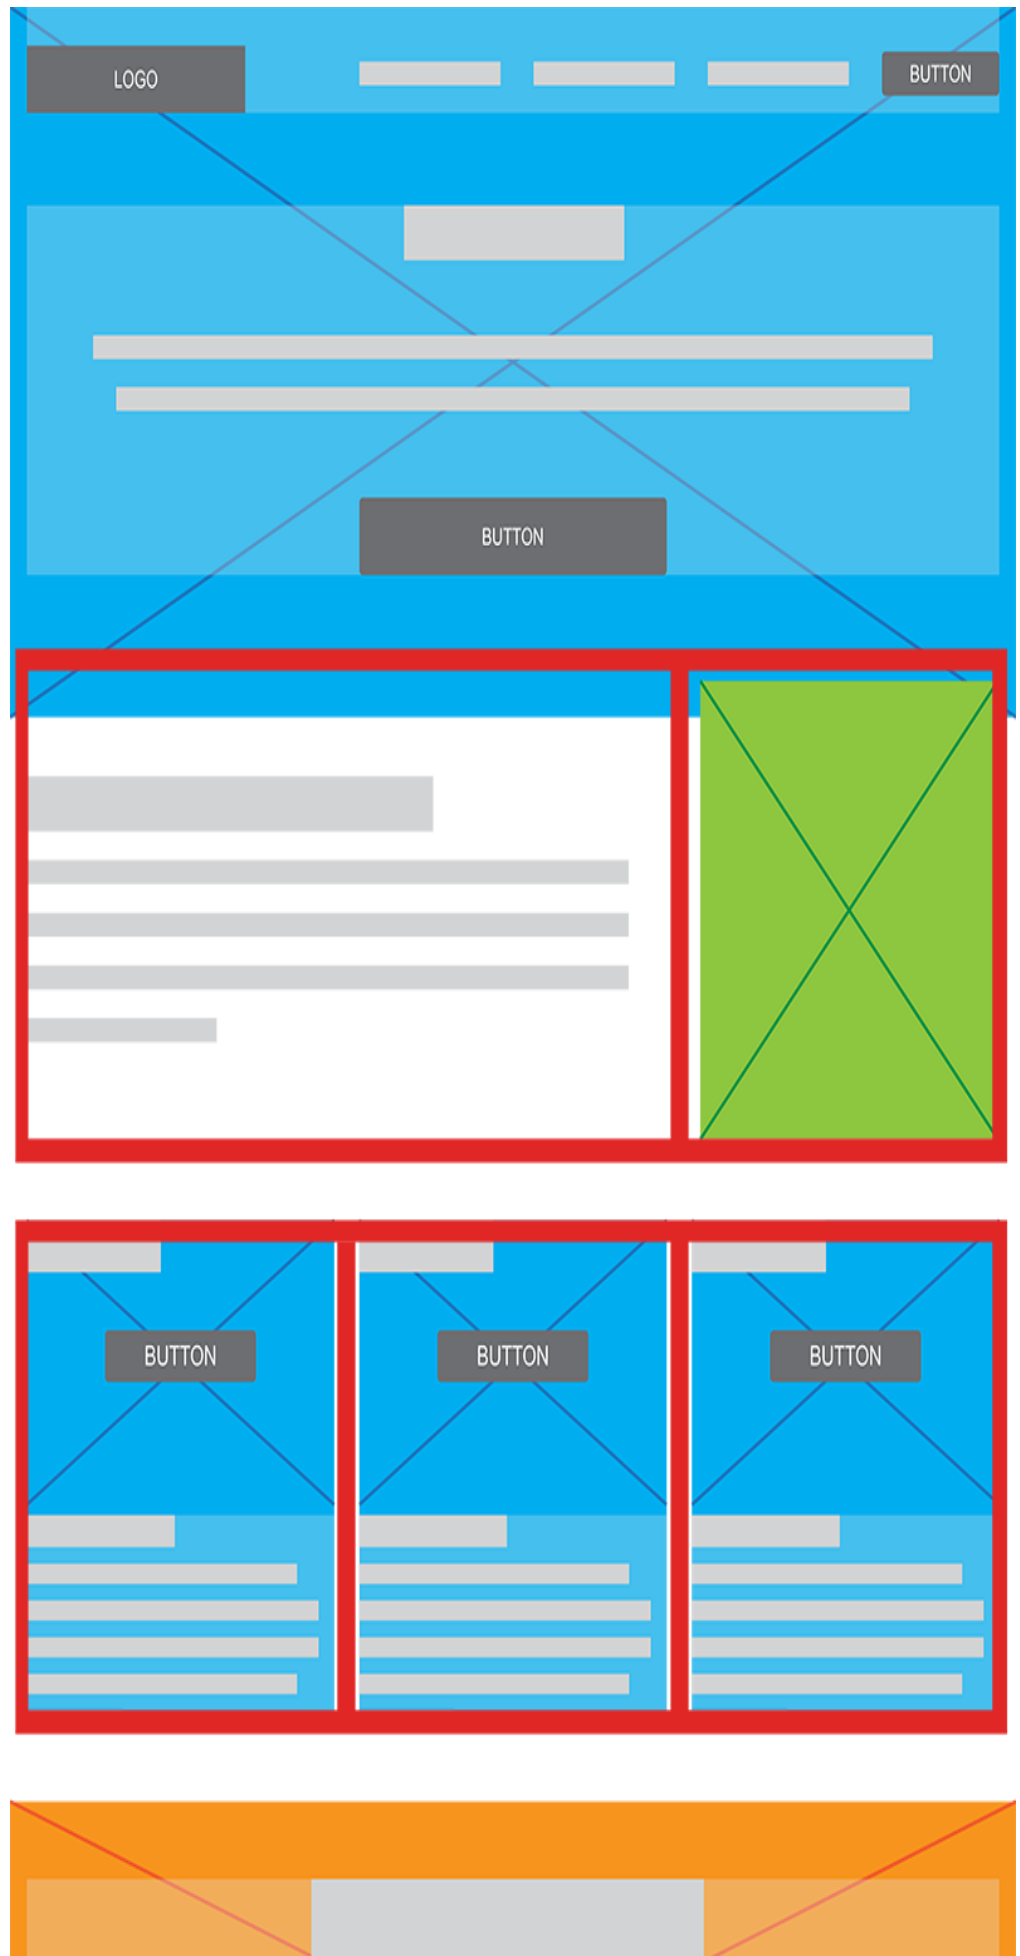

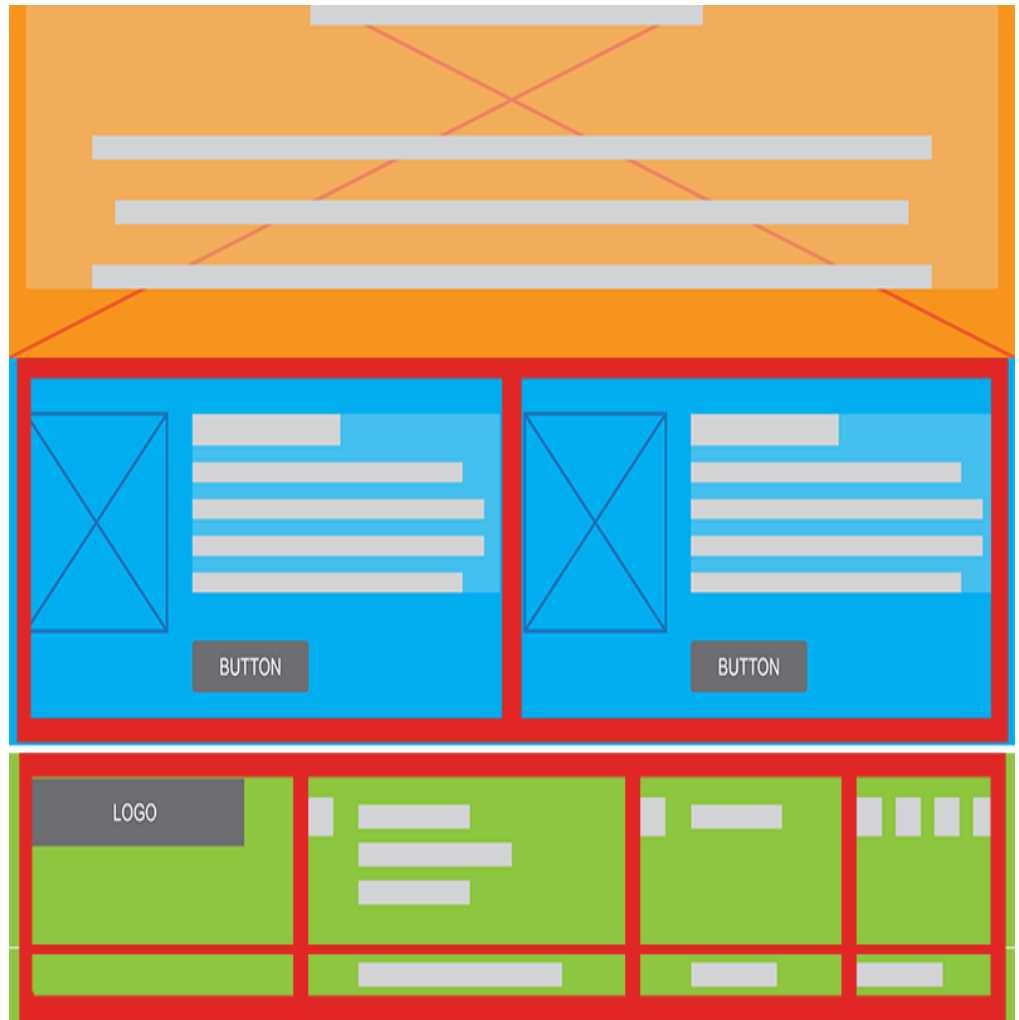

Self-Assessment Lab: Build a Fluid Layout from a Wireframe

Assessment

- ▶ Module 2 - CSS Modules and High Fidelity Designs
- ▶ Module 3 - Sass/Less and Preprocessing
- ▶ Module 4 - Web App Testing and Support for Browsers and Devices
- ▶ Post-Course Survey

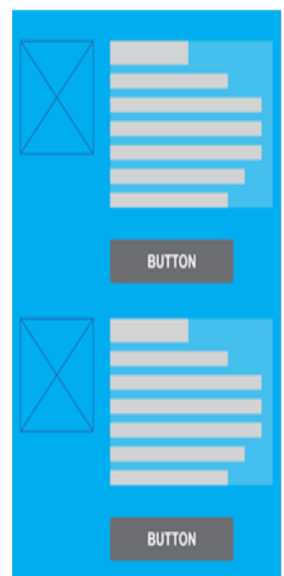

4. In the image below, you will notice that two columns stack down vertically for mobile.

Desktop View

Mobile View

Now that we have spent the time discovering what we will be building, we can charge forward confidently.
